

## UV curable, ultra low voc resin for underground pipe rehabilitation

The UVLCR is a UV curable, ultra low VOC resin. UVLCR can be used for cured in place pipe applications that do not allow the use of styrene or other VO components. Use the highest quality resin for the highest quality installations!

- Highest quality
- Ultra low VOC content
- Excellent UV cure profile - Fast curing
- Superior mechanical properties

Make the order now, we are sure that you will be satisfied with the result as well as the price!

### ISO 9001:2008 CERTIFIED

The Quality Management Systems at every manufacturing facility have been certified as meeting ISO 9001:2008 standards. This certification recognizes that each facility has an internationally accepted model in place for managing and assuring quality. We follow the practices set forth in this model to add value to the resins we make for our customers.
